South Carolina's Unemployment Rate Increases in November

South Carolina's unemployment rate rose sharply in November to 12.3%, from a revised October rate of 12.0 %, the State Employment Security Commission reported today. November's jobless figures set a record high for the state. Estimates produced by the Bureau of Labor Statistics reported the state's labor force at 2,173,054 in November, an increase of 2,079. The number of unemployed increased 5,896 to 266,330. The national unemployment rate was 10.0% in November, down from 10.2% in October.

The state's job count decreased by 1,500 in November, with most of the decreases occurring in Construction (-1,700), and Leisure and Hospitality (-6,600). Partially offsetting the losses were gains in Government (+1,900), Retail Trade (+1,100), Professional & Business Services (+2,600), and Manufacturing (+600). Of note, gains in Manufacturing were observed for the first time since May of 2008. The state's overall job count was 50,800 below the year-ago level and nearly 95,200 below the December 2007 level when the recession began.

"We have seen an increase in the number of people returning to the workforce for the first time since May, and we will likely see the number of unemployed rise throughout the fall months. Going forward, extensive job creation in the private sector will be a key factor in lowering the state's unemployment rate for the long term," said Sam Foster, Interim Executive Director of the Commission.

Special Note:

On October 2, 2009, the Bureau of Labor Statistics stated that job losses reported for the nation during the 12-month period ending last March were 824,000 more than were originally reported. This revision was the result of an annual benchmarking process where preliminary job count estimates developed through sampling and estimating models are revised based on more up-to-date data from employer payroll records. South Carolina, as well as all other states, will be conducting their annual benchmarking over the next few months. If national trends are followed, most states will likely show greater jobs losses than are currently being reported in the preliminary estimates. The revised benchmarked data will be released early in 2010.
